DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 2-11, 13 and 14 in the reply filed on 17 March 2008 is acknowledged.

2. Claims 12 and 15-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 17 March 2008.

Priority

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 2-11, 13 and 14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had

Art Unit: 1791

possession of the claimed invention. The limitations set forth in these newly-added claims (in particular, the temperature ranges, draw ratio ranges and recovery ranges) are not supported by the originally-filed specification.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 3-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 3-9 depend from claim 1, which has been cancelled by applicant and thus, these claims do not further limit the subject matter of claim 1.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered

Art Unit: 1791

therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

10. Claims 2-11, 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Roby et al (Roby I, U.S. Patent 6,235,869 B1) in combination with Roby et al (Roby II, U.S. Patent 6,191,236 B1).

Roby I (see the entire document, in particular, col. 2, line 58 to col. 3, line 8; col. 3, lines 13-42; col. 4, line 64 to col. 6, line 35) teaches a process of making a monofilament suture as claimed, except that Roby I does not explicitly teach values within the temperature ranges for the second and third ovens, which are taught by Roby II (see the entire document, in particular, Table I) and such would have been obvious to one of ordinary skill in the art at the time the invention was made in the process of Roby I in view of Roby II principally in order to manufacture biodegradable sutures having good flexibility and handling characteristics. Furthermore, all the claimed elements were known in the prior art and one skilled in the art could have combined the elements as claimed with no change in their respective functions, and the combination would have yielded nothing more than predictable results to one of ordinary skill in

Art Unit: 1791

the art at the time the invention was made (KSR International Co. v. Teleflex Inc., 550 U.S. ____, 82 USPQ2d 1385 (2007)).
